

Burning garbage is bad for you, your neighbours and your planet.

Burning garbage releases poisons into the environment.

These toxins are linked to heart disease, cancer and developmental issues in children.

Let's stop burning garbage in the Yukon. Ask your municipality,

community leaders or MLA about cleaner, healthier alternatives.

For more information and to find out what materials are safe to

burn, visit our web site at: www.ravenrecycling.org. Click on the Breathe Better logo.
